Education

Amity University – 8.79 (CGPA)

Bachelor of Technology in Computer Science Engineering

July 2019 – June 2023

Gurugram, Haryana

Experience

Swiggy

Software Development Engineer

May 2025 – Present

Bengaluru, Karnataka, India

- Implemented an **over-the-air (OTA) updates pipeline** for the React Native app to ship fixes and features without full app-store releases; enabled staged rollouts, instant rollback, and version management.
- Designed and shipped the end-to-end **seller onboarding flow** for **Pyng by Swiggy** (AI-based expert services platform), covering identity/KYC capture, verification, and guided setup.
- Built an **AI-based QC & moderation engine** to automate compliance and quality checks across forms, media, and profile signals, reducing manual review effort and accelerating approvals.
- Seller externalisation:** delivered self-serve capabilities for sellers (catalog/profile management, pricing & availability, slot scheduling, and policy workflows) to improve activation and retention.
- Developed **internal tools** for product and category managers to monitor funnels, SLAs, and quality metrics.
- Profiling with **Flipper**, Metro, and Android/iOS tools; resolved performance issues ;optimized bundle size and memory.

Zenduty

Software Development Engineer

June 2022 – May 2025

Bengaluru, Karnataka, India

- Enhanced incident monitoring tools, reducing **response times by 25%** and minimizing downtime by 20%.
- Worked on the **REST API Service**, built internal automation tools and SDKs
- Developed a **data analysis app** using Prometheus, ElasticSearch, GraphQL, ChartJS, and NextJS.
- Created product landing pages, boosting engagement by 15%.
- Contributed to Zenduty's flagship platform, improving user experience and adding new features.
- Shipped multiple releases to **Google Play** and **App Store**; build/signing and staged rollouts.
- Re-architected the **React Native mobile app**, enhancing performance, developing new features, and creating an in-house UI library to support a complete redesign from the ground up.
- Led marketing initiatives, including setting up a **Customer Data Platform (CDP)** and **User Analytics**, and managing secondary web platforms such as Product Docs, Blog, and Landing Pages.
- Contributed to developer relations efforts by representing Zenduty at events like **KubeCon India** and **Grayscale AI Week**, giving talks and engaging with the developer community to promote the brand.

HeroApp

Co-Founder & Engineer

December 2021 – June 2022

Gurugram, Haryana, India

- Designed and developed a React Native-based mobile app.
- Managed technology initiatives, product design, and development as a founding team member.
- Led development efforts, ensuring timely delivery of high-quality products within budget constraints, and implemented agile methodologies resulting in a 30% efficiency gain.

Instahomes PH

Software Engineer Associate

April 2022 – June 2022

Manila, NCR Region, Philippines

- Collaborated with the CTO and CIO to enhance the web app, resulting in a 20% improvement in user experience.
- Optimized app performance and increased user engagement by 15%.
- Delivered high-quality work within project timelines and budget constraints.
- Fostered effective cross-functional team communication and collaboration, boosting productivity.

Guby Rogers

Web Developer & Product Generalist

September 2020 – February 2022

Gurugram, Haryana, India

- Built an online portal for Career Expo 2020, facilitating registration for 200+ attendees per session.
- Led a small team to revamp the brand's social media presence, increasing engagement and brand awareness by 30%.
- Developed event and workshop platform, leading to a 25% increase in attendance.

Projects

RCA Tool — Grafana Plugin | *React, Grafana, TypeScript, Golang*

April 2023

Developed a Grafana plugin for Root Cause Analysis, enabling rapid detection of anomalies and service failures. This tool significantly accelerated issue resolution, reducing the average resolution time by 30% through data-driven insights.

HostVille — Full Stack Booking Platform w/ Admin Dashboard | *GraphQL, JavaScript, NextJS, expressJS*

April 2023

A travel booking app connecting travelers with experiences worldwide, with a user-friendly interface and location-based search via MapBox API. Also built an admin dashboard for global administration by the admin which utilizes a GraphQL API and React Frontend. 🐙 [GitHub](#)

ZenDash - Internal Tool | *JavaScript, ReactJS, Django*

July 2022

A comprehensive global admin dashboard during my internship at Zenduty. Built an efficient and user-friendly platform for managing administrative tasks and data analysis. 🔗 [Link](#)

Zepeats – Food Delivery App | *React Native, Firebase, Google Cloud, Stripe*

December 2021

A food delivery application which provides a seamless and efficient ordering experience for users. 🐙 [GitHub](#) 🌐 [Demo](#)

Technical Skills

Programming Languages: JavaScript, Python, HTML, CSS, SQL, Core Java

Libraries / Frameworks: ReactJS, TailwindCSS, NextJS, React Native, Firebase, Django, Unit Testing, NodeJS, GatsbyJS, Redux, GraphQL

Interests / Familiar Technologies: Mobile Engineering, RabbitMQ, Kubernetes, UX Research, Human-Centric Design, Cross Platform, Linux, Prototyping, Native Modules. Kotlin/Swift

CI/CD & Releases: Fastlane, Bitrise, App Center/CodePush, Play Console, App Store Connect, GitHub Actions/Jenkins

Tools / Platforms: Docker, Cursor, Jenkins, AWS, Figma, Maestro/Detox (E2E), git

Databases / Stores: MySQL, MongoDB, Redis
